

### DESCRIPTION

SE-HPLC size standard is a calibration standard for size exclusion columns used with HPLC in bioanalytics. The mixture includes five proteins represent IgM, BsAb, IgG, Fc and Lysozyme respectively.

The standard can be used with most size exclusion HPLC columns. The standard is supplied as a set of five vials of protein mixture for qualitative analysis only. A 60 uL of standard mixture in each vial is sufficient for 5 injections.

### Molecular Weight of Standard Proteins

Proteins MW (kDa)

IgM	900
BsAb	250
IgG	150
Fc	50
Lysozyme	14

### STORAGE

Keep frozen.
